SOFTWARE ENGINEER

As a former lawyer, I managed over 60 cases at once, collaborated with multiple teams to meet tight deadlines, and ensured compliance with court procedures. For every case, I analyzed about 400 pages of detailed information and researched case law to address legal questions. I applied these skills to develop applications in my software engineering boot camp: I collaborated with teams, analyzed numerous problems, and researched to debug any issues. These experiences have refined my time-management, collaboration, analytical, and research skills, making me a highly effective software engineer.

TECHNICAL SKILLS

JavaScript | MongoDB | Express | React | Node | SQL | NoSQL | PostgreSQL | HTML | CSS | Python | Flask | Tailwind

TECHNICAL PROJECTS

Video Game Library | [Code](#) | [App](#)

- Designed a MERN-stack application with two libraries of games, including one for user customization
- Connected this SPA using a MongoDB database containing information regarding each game
- Built UI with React and Tailwind CSS for users to perform full CRUD functionality on each item
- Rendered video game data fetched by HTTP requests from the RAWG Video Games Database API
- Deployed app to Heroku using Git and managed Git repositories with GitHub

GitRipped | [Code](#) | [App](#)

- React single page application that contains preset exercises and allows users to customize their own
- Built the backend, including the model, view, and controller layers to organize data for each exercise
- Connected the application to a third-party REST API to import exercises and render data
- Created the UI components to show both custom and API exercises
- Extensively engaged in pair programming, debugging and version control best practices

Ollivanders | [Code](#) | [App](#)

- Full-stack application using Node.js, Mongoose, Express and EJS
- Implemented 7 RESTful routes and full CRUD functionality to allow the user to view, edit and add custom wands
- Used the Models, Views and Controllers paradigm (MVC) to design and create templates for each product

Emilio's Blackjack | [Code](#) | [App](#)

- Applied CSS to HTML elements via extensive DOM manipulation
- Researched JavaScript loops and combined them with the push method to form the deck as an array
- Implemented Math.random functions housed within multiple if and else if functions to deal cards randomly

PROFESSIONAL EXPERIENCE

Staff Attorney I | Catholic Charities Legal Assistance 06/2021 - 04/2022

- Identified legal problems of over 100 clients and communicated their resolution options to them
- Communicated with multiple opposing counsels to reach optimal case resolution for clients

Associate Attorney | Bryce Downey and Lenkov LLC 01/2021 - 06/2021

- Collaborated with multiple teams to execute case plan based on court deadlines and procedures
- Developed detailed legal strategy based on analysis of incident, medical treatment, and trial costs

Law Clerk | Bryce Downey and Lenkov LLC 01/2020 - 06/2020 & 10/2020 - 01/2021

- Researched case law extensively and adapted findings to calculate damages and write court motions

EDUCATION

General Assembly | *Software Engineering Certification* 11/2022

University of Illinois College of Law | *Juris Doctor* 05/2020

Loyola University Chicago | *Bachelor of Business Administration in Economics and Business Management* 05/2013
